SKILLS

Javascript, Typescript, Node.js, Express, Nest, React, Next, Bootstrap, Python, Django, PHP, Laravel, MySql, Postgresql, MongoDB, Redis, Firebase, AWS, Docker, PyQt, Golang, Microservices, Wordpress, CI/CD and GPT.

WORK EXPERIENCE

Edubaloo - Backend Developer   **MAY 2022 - Presently**

- Spearheaded the development and optimization of key features, including payment gateways and product key validations, using Node.js, Express, and MongoDB, reducing query load times by 40% and significantly enhancing user experience and retention.
- Implemented a notification system leveraging Firebase Cloud Messaging for real-time delivery and Redis for user data caching. The design, which considered user actions like payments and subscriptions, achieved a 30% uptick in notification delivery speed, leading to a 12% increase in daily active users.
- Led the implementation of adoption of testing frameworks, covering 95% of the codebase, to ensure code maintainability and reliability. This contributed to a 20% reduction in post-release bugs, leading to a more robust and stable platform.

Zercom - Full Stack Developer   **AUG 2020 - JAN 2021**

- Led the development of an intranet software solution aimed at efficiently tracking employees. Utilized PyQt to build a custom desktop application, seamlessly synchronizing data with a WordPress architecture through its REST API.
- Played a key role in the enhancement of various WordPress websites during my tenure, including the re-engineering of themes and plugins. Additionally, I demonstrated proficiency in debugging by addressing errors using my knowledge of PHP and familiarity with the WordPress Codex.

Flux Africa - Full Stack Developer   **JUNE 2020 - AUG 2020**

- Managed a critical process re-engineering project aimed at enhancing and consolidating end-to-end service processes within the organization, resulting in streamlined operations and improved efficiency.
- Independently led the development of customer relations management systems for a food delivery company, taking full ownership of the project without team supervision. Employed a wide range of technologies, including PHP, HTML, CSS, JavaScript, MySql and Bootstrap to deliver a robust and user-friendly system.

HNG Internship - Backend Developer   **APRIL 2020 - MAY 2020**

- Collaborated with diverse backend developers virtually, using Git and PHP, to contribute to multiple projects.
- Led the development of a robust API with Django Rest Framework and coordinated a cross-functional team to implement an income calculator for Piggyvest, as well as a solution for BVN verification and airtime payments using WalletAfrica APIs.

LEADERSHIP EXPERIENCE

Repotecc   **DEC 2019 - Presently**

- Pioneered the establishment of the inaugural technology community on campus, guiding students in their technology journeys, managing a diverse team of 32 mentors, each with distinct technology careers, and fostering a collaborative learning environment.
- Facilitated and oversaw the organization of bootcamps, workshops, and international conferences within the community, collectively reaching over 3,000 participants worldwide.

VOLUNTEERS EXPERIENCE

Google Developer Student Clubs - Chapter Lead   **AUG 2021 - JULY 2022**

Wordpress - Chapter Assistant Organizer   **DEC 2019 - MAR 2022**

EDUCATION

Oduduwa University Ipetumodu - B.ENG   **NOV 2016 - JUNE 2022**
